~~SECRET~~

The following intelligence organizations participated in the preparation of this estimate:

The Central Intelligence Agency and the intelligence organizations of the Departments of State, Defense, the Army, the Navy, the Air Force, AEC, and NSA.

Concurring:

Director of Intelligence and Research, Department of State
Director, Defense Intelligence Agency
Assistant Chief of Staff for Intelligence, Department of the Army
Assistant Chief of Naval Operations (Intelligence), Department of the Navy
Assistant Chief of Staff, Intelligence, USAF
Director for Intelligence, Joint Staff
The Atomic Energy Commission Representative to the USIB
Director of the National Security Agency

Abstaining:

The Assistant Director, Federal Bureau of Investigation, the subject being outside of his jurisdiction.

WARNING

This material contains information affecting the National Defense of the United States within the meaning of the espionage laws, Title 18, USC, Secs. 793 and 794, the transmission or revelation of which in any manner to an unauthorized person is prohibited.

THE ADVANCED WEAPONS PROGRAMS OF THE UAR AND ISRAEL

THE PROBLEM

To estimate likely developments in the advanced weapons programs of the UAR and Israel over the next several years, and the probable consequences of such programs.

CONCLUSIONS

A.

B. We believe that Israel is undertaking the development of a 250-300 nautical mile (n.m.) surface-to-surface missile (SSM) system. A wholly independent Israeli effort to develop and produce such a missile with a payload of 2,000 to 3,000 pounds would probably require three to four years and great expense. However, there is evidence that Israel expects to rely on France for substantial assistance. If Israel acquires full access to French technology, components and test facilities, it probably could

~~SECRET~~

produce a limited number of missiles with a range of about 250 n.m., a payload of some 4,000 pounds, and an elementary guidance system in about two years (1965). [REDACTED]

(Paras. 11-15)

C. The United Arab Republic (UAR), alone or in combination with other Arab States, does not have the capability of producing a nuclear weapon in the foreseeable future. The UAR is attempting to develop a SSM with a range of about 200 n.m. Despite the many difficult problems the UAR faces in its missile program, it may be able to deploy a small number of these weapons by mid-1964, assuming continued help by the West German technicians and a continuing supply of foreign components. We estimate the payload of this missile at only about 500 pounds and its CEP as large. The military value of such a weapon would be small. However, the UAR has a missile program going and has gained experience in the production of missiles. With access to outside help and components, it probably could in a few years produce a more effective weapon. (Paras. 18-24)

D. Despite continuing accusations by both the UAR and Israel that the other is developing chemical, biological, and radiological weapons of mass destruction, we have no evidence to confirm these charges. Both countries could, however, produce small quantities of chemical or biological warfare devices designed for clandestine use. Neither country can produce radiological warfare weapons. (Paras. 16-17, 25)

E. The purely military significance of any missile system either Israel or the UAR could produce is likely to be modest for some time to come, although if Israel develops a nuclear bomb its military capability will be greatly increased. The political and psychological impact of the advanced weapons programs is more important than the purely military effect and is already being felt. If Nasser could not devise a counter to an Israeli nuclear threat on his own, he probably would turn to the USSR to try to ensure his protection, and the Arabs would blame the West, including the US, for the increased Israeli threat. Israel, likewise, would become increasingly activist in its dealings with the Arabs. The factors which have inhibited a new outbreak of Arab-Israeli

~~SECRET~~

~~SECRET~~

hostilities in recent years still apply. Nevertheless, as the advanced weapons programs progress, tensions will probably rise on both sides. In an atmosphere of this kind, there would always be the possibility that one or the other side would initiate hostile action to safeguard its ultimate security. (*Paras. 26-33*)

CENTRAL INTELLIGENCE AGENCY

DISSEMINATION NOTICE

1. This document was disseminated by the Central Intelligence Agency. This copy is for the information and use of the recipient and of persons under his jurisdiction on a need to know basis. Additional essential dissemination may be authorized by the following officials within their respective departments:

- a. Director of Intelligence and Research, for the Department of State
- b. Director, Defense Intelligence Agency, for the Office of the Secretary of Defense
- c. Assistant Chief of Staff for Intelligence, Department of the Army, for the Department of the Army
- d. Assistant Chief of Naval Operations (Intelligence), for the Department of the Navy
- e. Assistant Chief of Staff, Intelligence, USAF, for the Department of the Air Force
- f. Director for Intelligence, Joint Staff, for the Joint Staff
- g. Director of Intelligence, AEC, for the Atomic Energy Commission
- h. Assistant Director, FBI, for the Federal Bureau of Investigation
- i. Director of NSA, for the National Security Agency
- j. Assistant Director for Central Reference, CIA, for any other Department or Agency

2. This document may be retained, or destroyed by burning in accordance with applicable security regulations, or returned to the Central Intelligence Agency by arrangement with the Office of Central Reference, CIA.

3. When this document is disseminated overseas, the overseas recipients may retain it for a period not in excess of one year. At the end of this period, the document should either be destroyed, returned to the forwarding agency, or permission should be requested of the forwarding agency to retain it in accordance with IAC-D-69/2, 22 June 1953.

4. The title of this document when used separately from the text should be classified: **FOR OFFICIAL USE ONLY**
