Subject: FOIA Request on FEMA Testing (Broadband over Power Lines)

Dear Ms. Chan:

I would like to obtain any information produced as a result of any testing of susceptibility of communications circuits or equipment to Broadband over Power Lines (BPL) involving FEMA personnel and conducted since April, 2003. This would include studies or measurements related to potential high frequency (HF) radio system interference from BPL. This information might be in the form of data collections, audio and/or video recordings, images, e-mails, and reports obtained or produced by FEMA

Please contact me promptly if there are questions as to what this encompasses. I am submitting this by e-mail to speed the processing, but will confirm it by USPS mail later today.

Thank you in advance for your help. I look forward to seeing the information.

Sincerely yours,

Dennis I. O'Quinn
