

# **Best Practices for Resource Allocation of Research and Technology Development (RTD) on CIIP and Deployment of Outcomes**

Joji Tateishi  
Information Security Office  
Cabinet Secretariat

# Background of Proposal

- **In light of the national security management on CIIP, major concerns are ...**
  - To what extent are the outcomes of R&D applied to CIIP? (Deployment)
  - Especially for the business continuity
  - Resource allocation for maintaining integrity of technologies regarding CIIP (Learning from best practices; Project Manager Scheme, Govn't Procurement, etc.)
- **Introduction of new technology for CIIP**
  1. Development from scratch through research cooperation b/w US & Japan
  2. Expansion of new technical standards of US-Japan to the world
  3. Linkage b/w technologies and regulations and counter-measures to cyber-terrorism
- **What kind of issues do exist in each technology field?**
  - (for Continuous Talking Agenda)
