PHYSICAL FACILITIES

The mission of the Physical Facilities Committee is to consider, on behalf of the Faculty Senate, all matters affecting the physical facilities of the University. The goal of the Committee is to attempt to assure that physical facilities are appropriate to the execution of the mission of the University.

A submission of this Committee is to review the annual plan for physical facilities to assure that it is reasonable in light of the University's goals and constraints. The goal of the Committee is to assure the appropriateness of the priorities assigned to tasks.

Another submission of this Committee is to review the long-term development plan for physical facilities. The goal of the Committee is to assure its reasonableness in light of the perceived needs of the total University community.

In addition, a submission of this committee is to think creatively about future physical facility needs of the University, define them, and seek their adoption by the administration. The goal of the committee is to assure that the physical plant will be responsive to developing needs of the University community.

Still another submission of this Committee is to independently assess the current condition of the physical plant, particularly from the point of view of safety, and to make any recommendations deemed appropriate.

Further, another submission of this Committee is to be available to the administration to provide advice and counsel on any matter affecting physical facilities, especially proposed changes to the physical plant.

Finally, another submission of this Committee is, while maintaining a University-wide perspective, to voice a point of view of the faculty on all physical facility matters affecting the execution of the teaching/research mission.
