Women and Water in South and Central Asia:
Building a Sustainable Future

Access to and management of water, one of the most crucial, life-sustaining resources underlies security and development in South and Central Asia. This conference will bring together grassroots and international experts working on water and women's empowerment in the region, to share knowledge and build sustainable local solutions.

Tuesday, October 1, 2013
9:00am - 5:00pm
OSCE Academy, Bishkek, Kyrgyzstan
