Russia's Emerging Conventional Long-Range Capability and the INF Treaty

with

Nikolai Sokov
Senior Fellow, James Martin Center for Nonproliferation Studies

The emergence of Russian long-range conventional strike capability has a number of implications for Europe and the Middle East, as well as for Russia's evolving position on the 1987 INF Treaty. Please join us for a discussion of the conceptual underpinnings, key assets, and likely missions of Russian conventional strike capability and their implications.

Dr. Nikolai Sokov is Senior Fellow and Adjunct Professor at the James Martin Center for Nonproliferation Studies, Middlebury Institute of International Studies at Monterey. His areas of expertise are Russian, U.S., and NATO nuclear weapons, policies, and postures; nuclear arms control and nonproliferation; and verification and compliance. He has authored more than 20 books and monographs and more than 200 articles. He is also the co-author and co-editor of the first Russian-language college-level textbook on nuclear nonproliferation (Yadernoie Nerasprostranenie, PIR Center).

Wednesday, October 28, 2015
9:30 - 11:00 am
Room B17
