The Global Crisis and Sub-Saharan Africa

Antoinette Sayeh
African Department
International Monetary Fund
Main Messages

1. The global crisis is affecting SSA: growth is falling sharply, and fiscal and BoP pressures are mounting.

2. Policymakers have some room to respond with stimulative policies, but financing constraints impose limits.

3. The IMF has scaled up its support for Africa with increased and more flexible financing, technical assistance and policy advice.
Main Transmission Channels of the Crisis to Sub-Saharan Africa

- Declining External Demand for SSA’s Output.
- Slumping Commodity Prices.
- Scarcer Financial Flows.
Growth is slowing down

GDP Growth

Policy Response in SSA

Countries should respond to the crisis by:

• Using fiscal space where available, considering medium-term sustainability.

• Where possible, using monetary policy and allowing the exchange rate to adjust to counter demand slowdown.

• Countries have been responding broadly along these lines
Fiscal Policy Response

Sub-Saharan Africa: Fiscal Deficit Changes (Percentage points of GDP, 2009 minus 2008)
Monetary Policy Response
